

REQUIRED

Clinic Account #: ARP60502

Zip Code: 83814-6178

Hospital/Clinic: Panhandle Animal Labs

Veterinarian: _____ Owner Last Name: _____ Animal Name: _____

Collection Date: _____ Species: _____ Breed: _____ Age: _____ Sex: ☐ M ☐ M(N) ☐ F ☐ F(S) Patient ID/MRN: _____

Staff Pet: ☐ Please check if this is for an employee's personal pet.*

Required: History/Lesion Description Failure to provide appropriate information may delay results.

Sample/Site Location

	# of Slides	# of Tissue Pieces	# of Tubes
1. _____	_____	_____	_____
2. _____	_____	_____	_____
3. _____	_____	_____	_____

Standard margin evaluation is included on all applicable specimens.

Duration of Lesion/Clinical Signs (Attach additional pages as needed): _____

Specific questions/concerns (if any) regarding this specimen: _____

For mass lesions: Size: _____ Shape: _____ Color: _____ Consistency: _____ Distribution: _____

Working clinical diagnosis: _____

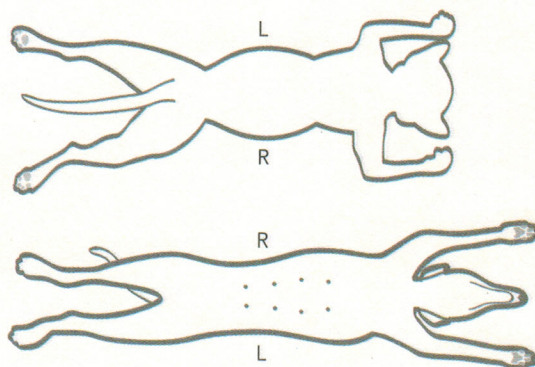

Pathologist preference (accommodated when possible): _____

Histopathology

- ☐ **ZN100 Simple, Single Site** Formalin-fixed tissue. Single site tissue, no more than 10 cm in any dimension
- ☐ **ZN101 Simple, Multiple Sites (up to 5 sites)** Formalin-fixed tissue. Tissue samples from multiple sites, samples no more than 10 cm in any dimension
- ☐ **ZN102 Complex, Level 1** Fresh or formalin-fixed tissue. Whole organs such as eye, spleen, testicle/s, uterus, ovaries; amputated digit; multiple gastrointestinal biopsies; a sample greater than 10 cm in any dimension, such as liver lobe, lung lobe, mastectomy; dermatopathology without a dermatologist consult; samples from more than 5 sites
- ☐ **ZN103 Complex, Level 2** Fresh or formalin-fixed tissue. Examples: Mandible, maxilla (all jaws, regardless of size), amputated limb, and other large/atypical samples containing bone
- ☐ **ZN400 Dermatopathology Panel (includes Histopathology & Dermatologist Consult)** Consult provided after dermatopathology. Tissue, detailed history, and images are required. Skin punch biopsies or other similarly sized skin sample. Addendum provided with dermatologist case management guidance. Clinical images can be sent to referencelabpathology@zoetis.com
- ☐ **ZN500 Hepatopathology (Liver) Panel** H&E, copper, iron, and connective tissue stains and copper quantification. Please submit at least three 1 cm, 14G hepatic needle biopsies, a wedge biopsy, or other larger liver tissue sample. Any liver imaging reports required
- ☐ **ZN301 Necropsy in a Jar** For specimens collected (and placed in formalin) while performing an in-clinic necropsy. NOT for fresh or formalin fixed whole bodies. Tissue, detailed history, differential diagnosis, and gross necropsy findings are required

Cytopathology

- ☐ **7120 Simple: Single Site** Unstained, air-dried slides or fluid in LTT
 - Single site
 - Multiple lymph nodes
 - Fluid/Flush from lesion
 - Joint fluid (slides only)
- ☐ **7201 Complex** Unstained, air-dried slides or fluid in LTT
 - FNA of more than one site
 - Joint fluid (complete analysis)
 - CSF
 - Cavitary effusion fluid analysis
 - Bone marrow
 - Airway washes (BAL/TTW)
